

Aditi Sharma

Python Developer | Aspiring ML Engineer

Summary:

Detail-oriented developer with 2 years of experience building data-driven applications in Python. Comfortable with machine learning fundamentals, NLP, and building interactive tools with Streamlit.

Skills:

Python, Pandas, NumPy, Scikit-learn, Machine Learning, NLP, spaCy, NLTK, Sentence Transformers, SQL, Git, Streamlit, Flask, Data Analysis, Data Visualization

Experience:

Software Engineer, BrightData Labs (2023 - Present)

- Built internal dashboards using Streamlit and Pandas for data QA
- Developed a resume-matching prototype using Sentence Transformers and cosine similarity
- Automated data cleaning pipelines in Python, reducing manual QA time by 40%

Junior Developer, Nimbus Softworks (2021 - 2023)

- Wrote REST APIs in Flask for an internal reporting tool
- Used SQL for reporting queries against a PostgreSQL database
- Collaborated with a small team using Git and Agile sprints

Education:

B.Tech in Computer Science, VIT University (2017 - 2021)

Projects:

- Sentiment Analysis Tool: NLP pipeline using spaCy + NLTK for social media text
- Resume Matcher: Streamlit app matching resumes to job descriptions with embeddings
